## Who we are?

"**DILUKZ Software Solutions**" is a family owned company with a solid foundation which commenced operation on November, 2014. We offer services and products related to Software and Web Development, Web Designing and Graphic Designing under several categories for business, corporate and personal needs where our main focus is to provide customers with affordable & quality solutions which will lead them to success.

## Our Mission

Providing solutions reaching the best satisfaction of the customer

## Our Vision

Be a Revolution in the field of technology in Sri Lanka

## Products

We offer a set of software products under the name of **DILUKZ**, with unique features and interactive user experience. Among them our Inventory Management System, Institute Management System and Jobcard Management System take the lead.

We are always dedicated to improve the software we develop just as you want in exactly the way you want. Besides we move forward with the world and we don't go on this journey alone, we always take you with us.

## Services

We provide services under several categories covering all major aspects of a business such as information management, design and marketing solutions.

### Software/Web Development

We undertake all types of software application development for both desktop and web platforms. Soon we are planning to move in to mobile platform as well. We also develop E-Commerce applications for your desire.

### Web Designing

Web site is now a major part of a well established company and we are happy to offer our services by creating unique web designs especially created for your or company requirement . We are handling all aspects of the website from design to hosting and it will not be a headache anymore for you.

## Graphic Designing

Under this category we provide solutions for almost all parts of graphic designing including Logos, eFlyers, Brochures, Banners, Business Cards, Posters etc. Creativity is a habit; we always let it flow into your solutions.
